## SUBJECT INDEX

Volumes 75, 76, 77 and 78, 1989

## 1. ASYMPTOTIC ANALYSES

- Cylindrical Premixed Laminar Flames, 75: 265  
 Transient Analysis of Carbon Combustion in Stagnation Flow, 75: 281  
 Analysis of Some Nonlinear Premixed Flame Phenomena, 75: 309  
 Flame Propagation in a Nonuniform Mixture: Analysis of a Slowly Varying Triple Flame, 76: 71  
 An Asymptotic Analysis of Branched-Chain Ignition of Cold Combustible Gas by Hot Inert Gas, 76: 143  
 Flame-Speed Sensitivity to Temperature Changes and the Deflagration-to-Detonation Transition, 77: 201  
 A Theory for Triple Point Spacing in Overdriven Detonation Waves, 77: 219  
 Radial Propagation of Premixed Flames and  $\sqrt{t}$  Behavior, 78: 275

## 2. COMBUSTION IN PRACTICAL SYSTEMS

- Diesel Particulate Emissions: The Role of Unburned Fuel, 75: 1  
 Pulse Combustion: The Importance of Characteristic Times, 75: 33  
 Devolatilization and Ignition of Coal Particles in a Two-Dimensional Fluidized Bed, 75: 57  
 Measurement of Combustion Kinetics of a Single Char Particle in an Electrodynamic Thermogravimetric Analyzer, 75: 81  
 Combustion of Parallel Fuel Droplet Streams, 75: 241  
 Thermal Decomposition of Isooctyl Nitrate, 75: 415  
 Multipoint Ignition by Flame Dispersion, 75: 417  
 Ignition Behavior of a Multicomponent Fuel Spray, 76: 5  
 The Combustion of Loy Yang Brown Coal, 76: 29  
 Influence of Char Fragmentation on Ash Particle Size Distributions, 76: 183  
 Oxidation Kinetics of Monodisperse Spherical Carbonaceous Particles of Variable Properties, 76: 221

Dynamic Behavior of Coal Char Particle Combustion, 76: 311

A New Method for the Computation of Particulate Dispersion in Turbulent Two-Phase Flows, 76: 403

A Comparison of Electromagnetic Wave and Radiative Transfer Equation Analyses of a Coal Particle Surrounded by a Soot Cloud, 76: 415

Ignition of Coal Particles: A Review, 77: 3

Elovichian Kinetics During Chemisorption of Oxygen on Semicoke, 77: 31

Lean Flammability Limits and Laminar Burning Velocities of CH<sub>4</sub>-Air-Graphite Mixtures and Fine Coal Dusts, 77: 41

The Suitability of Ultrafine coal as an Industrial Boiler Fuel, 77: 51

Secondary Fragmentation of Char Particles During Combustion In a Fluidized Bed, 77: 79  
 Mathematical Modeling of Coal-Fired Fluidized Bed Combustors, 77: 91

Effect of Fuel Aromaticity on Diesel Emissions, 77: 267

Fractals and Turbulent Premixed Engine Flames, 77: 295

Flame Initiation and Development from Glow Discharges—Effect of Electrode Deposits, 77: 321

Discrete Simulation of Cenospheric Coal-Char Combustion, 77: 337

Pulse Combustor Tail-Pipe Heat-Transfer Dependence on Frequency, Amplitude and Mean Flow Rate, 77: 359

Mechanisms of Nitrous Oxide Formation in Coal Flames, 77: 375

A Technique for Velocity Measurement in Diesel Sprays, 77: 385

How to Attack Complex Gas Phase Combustion Systems, 78: 13

Velocity Measurements in Inhomogeneous Combustion Systems, 78: 129

Influence of Hydrocarbon Fuel Structural Constitution and Flame Temperature on Soot

- Formation in Laminar Diffusion Flames, 78: 179
- Measured and Predicted Char Reactivity of Three U.S. Coals, 78: 195
- Time-Resolved Particle Temperature and Mass Loss Measurements of a Bituminous Coal During Devolatilization, 78: 223
- The Relationship Between Cyclic Variations in Spark-Ignition Engines and the Small Scale Structure of Turbulence, 78: 237
- 3. COMBUSTION STABILITY/INSTABILITY**
  - Pulse Combustion: The Importance of Characteristic Times, 75: 33
  - Chaotic Oscillations of Cool Flames, 75: 107
  - Azimuthal Structure of an Annular Diffusion Flame, 75: 229
  - An Experimental Study on Extinction and Stability of Tubular Flames, 75: 367
  - Definition of Heater Location to Drive Maximum Amplitude Acoustic Oscillations in a Rijke Tube, 76: 17
  - A Study of Cylindrical Premixed Flames with Heat Loss, 76: 89
  - Hydrodynamic and Reactive/Diffusive Instabilities in a Dynamic Model of Liquid Propellant Combustion. II: Inviscid Fluid Motions, 77: 123
  - A Theory for Triple Point Spacing in Overdriven Detonation Waves, 77: 219
  - Pulse Combustor Tail-Pipe Heat-Transfer Dependence on Frequency, Amplitude and Mean Flow Rate, 77: 359
- 4. COMBUSTION SYSTEMS: ANALYTICAL AND NUMERICAL DESCRIPTIONS**
  - Numerical Simulations for Combustion of Quiescent and Turbulent Mixtures in Confined Vessels, 75: 123
  - Heat Transfer in a Radiating Medium between Flame and Fuel Surface, 75: 153
  - Ignition of Hydrogen-Oxygen-Diluent Mixtures Adjacent to a Hot, Nonreactive Surface, 75: 197
  - Combustion of Parallel Fuel Droplet Streams, 75: 241
  - On the Postshock Flow Field of Carbon Particle Laden Gases, 75: 255
  - Transient Analysis of Carbon Combustion in Stagnation Flow, 75: 281
  - Analysis of Some Nonlinear Premixed Flame Phenomena, 75: 309
  - Heterogeneous Ignition of Coal Dust Clouds, 75: 325
  - Ignition Behavior of a Multicomponent Fuel Spray, 76: 5
  - A Numerical Model of Combustion in Gasless Pyrotechnic Systems, 76: 63
  - Flame Propagation in a Nonuniform Mixture: Analysis of a Slowly Varying Triple Flame, 76: 71
  - A Study of Cylindrical Premixed Flames with Heat Loss, 76: 89
  - Analysis of the Structure and Mechanisms of Extinction of a Counterflow Methanol-Air Diffusion Flame, 76: 111
  - Steady Combustion of a Gaseous Fuel Flowing Over a Hot Vertical Surface, 76: 133
  - A Theoretical Model of Premixed Turbulent Combustion in Closed Vessels, 76: 243
  - Dynamic Behavior of Coal Char Particle Combustion, 76: 311
  - A New Method for the Computation of Particulate Dispersion in Turbulent Two-Phase Flows, 76: 403
  - Propagation of a Premixed Flame in a Divided-Chamber Combustor, 77: 101
  - Hydrodynamic and Reactive/Diffusive Instabilities in a Dynamic Model of Liquid Propellant Combustion. II. Inviscid Fluid Motions, 77: 123
  - Direct Numerical Simulations of Mixing and Reaction in a Nonpremixed Homogeneous Turbulent Flow, 77: 171
  - Flame-Speed Sensitivity to Temperature Changes and the Deflagration-to-Detonation Transition, 77: 201
  - The Burke-Schumann Diffusion Flame Revisited—With Fuel Spray Injection, 77: 229
  - Chemical Closure Model for Fractal Flamelets, 77: 241
  - Fractals and Turbulent Premixed Engine Flames, 77: 295
  - Effect of Radiative Heat Transfer on Combustion Chamber Flows, 77: 347

- How to Attack Complex Gas Phase Combustion Systems, 78: 13
- Thermokinetic Combustion Oscillations as an Alternative to Thermal Explosion, 78: 87
- 5. COMBUSTION SYSTEMS: MODELING AND SCALING**
- Linear-Eddy Modeling of Turbulent Transport. II: Application to Shear Layer Mixing, 75: 397
- Mathematical Modeling of Coal-Fired Fluidized Bed Combustors, 77: 91
- Direct Numerical Simulations of Mixing and Reaction in a Nonpremixed Homogeneous Turbulent Flow, 77: 171
- Population-Balance Model of Physical Transformations of Ash During Char Oxidation, 77: 187
- Modeling of Inhomogeneities in the Toroidal Jet-Stirred Reactor, 78: 99
- Rotational Effects in Density-Stratified Reacting Gases, 78: 121
- 6. COMBUSTION SYSTEMS: NEW**
- Measurement of Combustion Kinetics of a Single Char Particle in an Electrodynamic Thermogravimetric Analyzer, 75: 81
- 7. DETONATIONS, CONDENSED PHASE AND HETEROGENEOUS**
- Improved Prediction of Cylinder Test Energies, 76: 297
- Estimation of the Efficiency of Nonideal Explosives, 76: 369
- 8. DETONATIONS, GAS PHASE**
- Transition to Detonation in a Flame Jet, 75: 297
- Deflagration to Detonation Transitions and Strong Deflagrations in Alkane and Alkene Air Mixtures, 76: 169
- Flame-Speed Sensitivity to Temperature Changes and the Deflagration-to-Detonation Transition, 77: 201
- A Theory for Triple Point Spacing in Overdriven Detonation Waves, 77: 219
- The Representation of Thermodynamic Functions of Detonation and Combustion Products, 77: 411
- 9. DIAGNOSTICS, LASER**
- Laser Tomography of Turbulent Premixed Bunsen Flames, 75: 165
- Azimuthal Structure of an Annular Diffusion Flame, 75: 229
- A Tunable IR-Diode Laser Technique for Measuring Reaction Rates of High-Temperature Aerosols, 77: 69
- A Technique for Velocity Measurement in Diesel Sprays, 77: 385
- Visualization of Soot Zones in Turbulent Diffusion Flames, 77: 405
- How to Attack Complex Gas Phase Combustion Systems, 78: 13
- Velocity Measurements in Inhomogeneous Combustion Systems, 78: 129
- Semiquantitative Laser-Induced Fluorescence in Flames, 78: 153
- Comparisons Between Flame Species Measured by Probe Sampling and Optical Spectrometry Techniques, 78: 169
- A Comparison of the Velocity and Scalar Spectra in Premixed Turbulent Flames, 78: 205
- Interpretation of Laser Attenuation Measurements in Sooty Fires, 78: 257
- Fluorescence Spectra and Polycyclic Aromatic Species in a N-Heptane Diffusion Flame, 78: 308
- Soot Particle Aerosol Dynamics at High Pressure, 78: 390
- 10. DIAGNOSTICS, OPTICAL AND PHOTOGRAPHIC**
- Measurement of Combustion Kinetics of a Single Char Particle in an Electrodynamic Thermogravimetric Analyzer, 75: 81
- How to Attack Complex Gas Phase Combustion Systems, 78: 13
- Comparisons Between Flame Species Measured by Probe Sampling and Optical Spectrometry Techniques, 78: 169
- Fluorescence Spectra and Polycyclic Aromatic Species in a N-Heptane Diffusion Flame, 78: 308
- Visual Observations of a Turbulent Diffusion Flame, 78: 377
- Soot Particle Aerosol Dynamics at High Pressure, 78: 390
- 11. DIAGNOSTICS, OTHER**
- Measurement of Combustion Kinetics of a Single Char Particle in an Electrodynamic Thermogravimetric Analyzer, 75: 81

- Kinetic Modeling of Artifacts in the Measurement of N<sub>2</sub>O From Combustion Sources, 77: 139
- How to Attack Complex Gas Phase Combustion Systems, 78: 13
- Gas Pyrolysis in Combustion: Single-Pulse Shock Tube Studies of N- and O-Atom-Containing Hetrocyclics, 78: 43
- Comparisons Between Flame Species Measured by Probe Sampling and Optical Spectrometry Techniques, 78: 169
- Cyanuric Acid + Nitric Oxide Reaction at 700°C and the Effects of Oxygen, 78: 249
- The Effect of Metallic Additives on Ionization and Soot Formation in Oxy-Acetylene Flames, 78: 339

## 12. EXPERIMENTAL TECHNIQUES OR RESULTS, BURNERS

- Laser Tomography of Turbulent Premixed Bunsen Flames, 75: 165
- The Effect of Sulfur Dioxide on Soot and Polycyclic Aromatic Hydrocarbon Formation in Premixed Ethylene Flames, 75: 175
- In Situ Measurements of Oxide Particles in Boron-Containing Diffusion Flames, 75: 183
- Azimuthal Structure of an Annular Diffusion Flame, 75: 229
- An Experimental Study on Extinction and Stability of Tubular Flames, 75: 367
- A Study of Cylindrical Premixed Flames with Heat Loss, 76: 89
- Thermal NO<sub>x</sub> in Stretched Laminar Opposed-Flow Diffusion Flames with CO/H<sub>2</sub>/N<sub>2</sub> Fuel, 76: 151
- Importance of Isothermal Mixing Processes to the Understanding of Lift-Off and Blowout of Turbulent Jet Diffusion Flames, 76: 197
- Combustion Regimes and the Straining of Turbulent Premixed Flames, 76: 213
- Oxidation Kinetics of Monodisperse Spherical Carbonaceous Particles of Variable Properties, 76: 221
- NO<sub>x</sub> Formation from the Combustion of Monodisperse n-Heptane Sprays Doped with Fuel-Nitrogen Additives, 76: 265
- Extinction Characteristics of a Stretched Cylindrical Premixed Flame, 76: 285
- Laminar Flame Speeds of Methane-Air Mixtures

- Under Reduced and Elevated Pressures, 76: 375
- Lean Flammability Limits and Laminar Burning Velocities of CH<sub>4</sub>-Air-Graphite Mixtures and Fine Coal Dusts, 77: 41
- Optical Detection of Large Soot Precursors, 77: 261
- Soot Particle Temperatures in Axisymmetric Laminar Ethylene-Air Diffusion Flames at Pressures up to 0.7 MPa, 77: 279
- Potassium Kinetics in Heavily Seeded Atmospheric Pressure Laminar Methane Flames, 77: 311
- Visualization of Soot Zones in Turbulent Diffusion Flames, 77: 405
- Velocity Measurements in Inhomogeneous Combustion Systems, 78: 129
- Semiquantitative Laser-Induced Fluorescence in Flames, 78: 153
- Influence of Hydrocarbon Fuel Structural Constitution and Flame Temperature on Soot Formation in Laminar Diffusion Flames, 78: 179
- A Comparison of the Velocity and Scalar Spectra in Premixed Turbulent Flames, 78: 205
- Silica Particle Synthesis in a Counterflow Diffusion Flame Reactor, 78: 287
- Turbulent Flame Speeds of Hydrocarbon Fuel Droplets in Air, 78: 299
- Fluorescence Spectra and Polycyclic Aromatic Species in a N-Heptane Diffusion Flame, 78: 308
- The Effect of Metallic Additives on Ionization and Soot Formation in Oxy-Acetylene Flames, 78: 339
- The Effect of Non Steady Electric Fields on Sooting Flames, 78: 357
- Visual Observations of a Turbulent Diffusion Flame, 78: 377

## 13. EXPERIMENTAL TECHNIQUES OR RESULTS, PLUG FLOW REACTORS

- The Combustion of Loy Yang Brown Coal, 76: 29
- Influence of Char Fragmentation on Ash Particle Size Distributions, 76: 183
- The influence of Catalytic Activity on the Surface Ignition of Boundary Layer Flows Part I: Hydroxyl Radical Measurements, 76: 325

- The influence of Catalytic Activity on the Gas Phase Ignition of Boundary Layer Flows Part II: Oxygen Atom Measurements, 76: 339
- A Parametric Exploration of the Dynamic Behavior of Flame Propagation in Planar Sprays, 76: 351
- Mechanisms of Nitrous Oxide Formation in Coal Flames, 77: 375
- Measured and Predicted Char Reactivity of Three U.S. Coals, 78: 195
- Time-Resolved Particle Temperature and Mass Loss Measurements of a Bituminous Coal During Devolatilization, 78: 223
- Cyanuric Acid + Nitric Oxide Reaction at 700°C and the Effects of Oxygen, 78: 249
- 14. EXPERIMENTAL TECHNIQUES OR RESULTS, QUASI-STATIC VESSELS**
- Chaotic Oscillations of Cool Flames, 75: 107
- Numerical Simulations for Combustion of Quiescent and Turbulent Mixtures in Confined Vessels, 75: 123
- A Study on Soot Formation in Premixed Constant-Volume Propane Combustion, 75: 221
- Criteria for Spontaneous Ignition in Exothermic, Autocatalytic Reactions: Chain Branching and Self-Heating in the Oxidation of Cyclohexane in Closed Vessels, 75: 381
- Flammability Limits of Arsine and Phosphine, 76: 307
- Propagation of a Premixed Flame in a Divided-Chamber Combustor, 77: 101
- Propene Oxidation at Low and Intermediate Temperatures: A Detailed Chemical Kinetic Study, 77: 145
- Flame Initiation and Development from Glow Discharges—Effect of Electrode Deposits, 77: 321
- Thermokinetic Combustion Oscillations as an Alternative to Thermal Explosion, 78: 87
- The Relationship Between Cyclic Variations in Spark-Ignition Engines and the Small Scale Structure of Turbulence, 78: 237
- 15. EXPERIMENTAL TECHNIQUES OR RESULTS, SHOCK TUBES**
- A Tunable IR-Diode Laser Technique for Measuring Reaction Rates of High-Temperature Aerosols, 77: 69
- Reaction of Nitric Oxide with Bound Carbon at Flame Temperatures, 77: 213
- Gas Pyrolysis in Combustion: Single-Pulse Shock Tube Studies of N- and O-Atom-Containing Heterocyclics, 78: 43
- 16. EXPERIMENTAL TECHNIQUES OR RESULTS, WELL STIRRED REACTORS**
- Modeling of Inhomogeneities in the Toroidal Jet-Stirred Reactor, 78: 99
- 17. FIRE OR EXPLOSION PHENOMENA, COMBUSTION SAFETY**
- An Experimental Investigation of Flame Behavior During Explosions in Cylindrical Enclosures with Obstacles, 75: 111
- Ignition of Hydrogen-Oxygen-Diluent Mixtures Adjacent to a Hot, Nonreactive Surface, 75: 197
- The Density of Smoke Droplets Produced by Thermal Degradation of Organic Solids, 75: 217
- Transition to Detonation in a Flame Jet, 75: 297
- Factors Influencing Chemisorption and Ignition of Wood Chars, 76: 37
- Factors Influencing Oxygen Chemisorption and Ignition of Chars from Newsprint, 76: 49
- Deflagration to Detonation Transitions and Strong Deflagrations in Alkane and Alkene Air Mixtures, 76: 169
- Flammability Limits of Arsine and Phosphine, 76: 307
- Interpretation of Laser Attenuation Measurements in Sooty Fires, 78: 257
- Analytical Models for Fire Spread Due to Radiation, 78: 398
- 18. FLAME IGNITION OR STABILIZATION**
- Devolatilization and Ignition of Coal Particles in a Two-Dimensional Fluidized Bed, 75: 57
- Relationship Between Impact Ignition Sensitivity and Kinetics of the Thermal Decomposition of Solid Propellants, 75: 139
- Ignition of Hydrogen-Oxygen-Diluent Mixtures Adjacent to a Hot, Nonreactive Surface, 75: 197

- Heterogeneous Ignition of Coal Dust Clouds, 75: 325
- Criteria for Spontaneous Ignition in Exothermic, Autocatalytic Reactions: Chain Branching and Self-Heating in the Oxidation of Cyclohexane in Closed Vessels, 75: 381
- Multipoint Ignition by Flame Dispersion, 75: 417
- Ignition Behavior of a Multicomponent Fuel Spray, 76: 5
- Factors Influencing Chemisorption and Ignition of Wood Chars, 76: 37
- Factors Influencing Oxygen Chemisorption and Ignition of Chars from Newsprint, 76: 49
- Synergistic Hypergolic Ignition of Blends of Dienes and Dienophiles with Red Fuming Nitric Acid as Oxidizer, 76: 107
- An Asymptotic Analysis of Branched-Chain Ignition of Cold Combustible Gas by Hot Inert Gas, 76: 143
- The influence of Catalytic Activity on the Surface Ignition of Boundary Layer Flows Part I: Hydroxyl Radical Measurements, 76: 325
- The influence of Catalytic Activity on the Gas Phase Ignition of Boundary Layer Flows Part II: Oxygen Atom Measurements, 76: 339
- Ignition of Coal Particles: A Review, 77: 3
- Flame Initiation and Development from Glow Discharges—Effect of Electrode Deposits, 77: 321
- Assessment of the Response of Rocket Propellants to High-Velocity Projectile Impact Using Small-Scale Laboratory Tests, 77: 395
- Radial Propagation of Premixed Flames and  $\sqrt{t}$  Behavior, 78: 275
- Analytical Models for Fire Spread Due to Radiation, 78: 398
  
- 19. FLAME QUENCHING OR EXTINCTION
- Cylindrical Premixed Laminar Flames, 75: 265
- Analysis of Some Nonlinear Premixed Flame Phenomena, 75: 309
- An Experimental Study on Extinction and Stability of Tubular Flames, 75: 367
- A Study of Cylindrical Premixed Flames with Heat Loss, 76: 89
- Analysis of the Structure and Mechanisms of Extinction of a Counterflow Methanol-Air Diffusion Flame, 76: 111
- Importance of Isothermal Mixing Processes to the Understanding of Lift-Off and Blowout of Turbulent Jet Diffusion Flames, 76: 197
- Extinction Characteristics of a Stretched Cylindrical Premixed Flame, 76: 285
  
- 20. FLAMES, DIFFUSION
- Studies of the Effects of Metallic and Gaseous Additives in the Control of Soot Formation in Diffusion Flames, 75: 45
- In Situ Measurements of Oxide Particles in Boron-Containing Diffusion Flames, 75: 183
- Azimuthal Structure of an Annular Diffusion Flame, 75: 229
- Flame Propagation in a Nonuniform Mixture: Analysis of a Slowly Varying Triple Flame, 76: 71
- Analysis of the Structure and Mechanisms of Extinction of a Counterflow Methanol-Air Diffusion Flame, 76: 111
- Thermal NO<sub>x</sub> in Stretched Laminar Opposed-Flow Diffusion Flames with CO/H<sub>2</sub>/N<sub>2</sub> Fuel, 76: 151
- Importance of Isothermal Mixing Processes to the Understanding of Lift-Off and Blowout of Turbulent Jet Diffusion Flames, 76: 197
- The Burke-Schumann Diffusion Flame Revisited—With Fuel Spray Injection, 77: 229
- Soot Particle Temperatures in Axisymmetric Laminar Ethylene-Air Diffusion Flames at Pressures up to 0.7 MPa, 77: 279
- Fractals and Turbulent Premixed Engine Flames, 77: 295
- Effect of Radiative Heat Transfer on Combustion Chamber Flows, 77: 347
- Visualization of Soot Zones in Turbulent Diffusion Flames, 77: 405
- Influence of Hydrocarbon Fuel Structural Constitution and Flame Temperature on Soot Formation in Laminar Diffusion Flames, 78: 179
- Silica Particle Synthesis in a Counterflow Diffusion Flame Reactor, 78: 287
- The Effect of Non Steady Electric Fields on Sooting Flames, 78: 357

Visual Observations of a Turbulent Diffusion Flame, 78: 377

Soot Particle Aerosol Dynamics at High Pressure, 78: 390

## 21. FLAMES, NONSTEADY

Pulse Combustion: The Importance of Characteristic Times, 75: 33

Chaotic Oscillations of Cool Flames, 75: 107

An Experimental Investigation of Flame Behavior During Explosions in Cylindrical Enclosures with Obstacles, 75: 111

Numerical Simulations for Combustion of Quiescent and Turbulent Mixtures in Confined Vessels, 75: 123

Transition to Detonation in a Flame Jet, 75: 297

Multipoint Ignition by Flame Dispersion, 75: 417

Definition of Heater Location to Drive Maximum Amplitude Acoustic Oscillations in a Rijke Tube, 76: 17

Flame Propagation in a Nonuniform Mixture: Analysis of a Slowly Varying Triple Flame, 76: 71

Deflagration to Detonation Transitions and Strong Deflagrations in Alkane and Alkene Air Mixtures, 76: 169

A Theoretical Model of Premixed Turbulent Combustion in Closed Vessels, 76: 243

Propagation of a Premixed Flame in a Divided-Chamber Combustor, 77: 101

Flame-Speed Sensitivity to Temperature Changes and the Deflagration-to-Detonation Transition, 77: 201

Fractals and Turbulent Premixed Engine Flames, 77: 295

Pulse Combustor Tail-Pipe Heat-Transfer Dependence on Frequency, Amplitude and Mean Flow Rate, 77: 359

How to Attack Complex Gas Phase Combustion Systems, 78: 13

The Relationship Between Cyclic Variations in Spark-Ignition Engines and the Small Scale Structure of Turbulence, 78: 237

## 22. FLAMES, PREMIXED

Chaotic Oscillations of Cool Flames, 75: 107

An Experimental Investigation of Flame Behavior

During Explosions in Cylindrical Enclosures with Obstacles, 75: 111

Numerical Simulations for Combustion of Quiescent and Turbulent Mixtures in Confined Vessels, 75: 123

Laser Tomography of Turbulent Premixed Bunsen Flames, 75: 165

The Effect of Sulfur Dioxide on Soot and Polycyclic Aromatic Hydrocarbon Formation in Premixed Ethylene Flames, 75: 175

Ignition of Hydrogen-Oxygen-Diluent Mixtures Adjacent to a Hot, Nonreactive Surface, 75: 197

A Study on Soot Formation in Premixed Constant-Volume Propane Combustion, 75: 221

Cylindrical Premixed Laminar Flames, 75: 265

Analysis of Some Nonlinear Premixed Flame Phenomena, 75: 309

An Experimental Study on Extinction and Stability of Tubular Flames, 75: 367

Multipoint Ignition by Flame Dispersion, 75: 417  
Flame Propagation in a Nonuniform Mixture: Analysis of a Slowly Varying Triple Flame, 76: 71

A Study of Cylindrical Premixed Flames with Heat Loss, 76: 89

Steady Combustion of a Gaseous Fuel Flowing Over a Hot Vertical Surface, 76: 133

An Asymptotic Analysis of Branched-Chain Ignition of Cold Combustible Gas by Hot Inert Gas, 76: 143

Combustion Regimes and the Straining of Turbulent Premixed Flames, 76: 213

A Theoretical Model of Premixed Turbulent Combustion in Closed Vessels, 76: 243

Extinction Characteristics of a Stretched Cylindrical Premixed Flame, 76: 285

Laminar Flame Speeds of Methane-Air Mixtures Under Reduced and Elevated Pressures, 76: 375

Lean Flammability Limits and Laminar Burning Velocities of CH<sub>4</sub>-Air-Graphite Mixtures and Fine Coal Dusts, 77: 41

Propagation of a Premixed Flame in a Divided-Chamber Combustor, 77: 101

Chemical Closure Model for Fractal Flamelets, 77: 241

- Optical Detection of Large Soot Precursors, 77: 261
- Potassium Kinetics in Heavily Seeded Atmospheric Pressure Laminar Methane Flames, 77: 311
- Semiquantitative Laser-Induced Fluorescence in Flames, 78: 153
- Comparisons Between Flame Species Measured by Probe Sampling and Optical Spectrometry Techniques, 78: 169
- A Comparison of the Velocity and Scalar Spectra in Premixed Turbulent Flames, 78: 205
- Radial Propagation of Premixed Flames and  $\sqrt{t}$  Behavior, 78: 275
- Reaction Kinetics of Hydrogen-Enriched Methane-Air and Propane-Air Flames, 78: 326
- The Effect of Metallic Additives on Ionization and Soot Formation in Oxy-Acetylene Flames, 78: 339
- Soot Particle Aerosol Dynamics at High Pressure, 78: 390

### 23. FLAMES, TURBULENT

- Numerical Simulations for Combustion of Quiescent and Turbulent Mixtures in Confined Vessels, 75: 123
- Laser Tomography of Turbulent Premixed Bunsen Flames, 75: 165
- Linear-Eddy Modeling of Turbulent Transport. II: Application to Shear Layer Mixing, 75: 397
- Multipoint Ignition by Flame Dispersion, 75: 417
- Importance of Isothermal Mixing Processes to the Understanding of Lift-Off and Blowout of Turbulent Jet Diffusion Flames, 76: 197
- Combustion Regimes and the Straining of Turbulent Premixed Flames, 76: 213
- A Theoretical Model of Premixed Turbulent Combustion in Closed Vessels, 76: 243
- Chemical Closure Model for Fractal Flamelets, 77: 241
- Fractals and Turbulent Premixed Engine Flames, 77: 295
- Effect of Radiative Heat Transfer on Combustion Chamber Flows, 77: 347
- Visualization of Soot Zones in Turbulent Diffusion Flames, 77: 405

- Rotational Effects in Density-Stratified Reacting Gases, 78: 121
- Semiquantitative Laser-Induced Fluorescence in Flames, 78: 153
- A Comparison of the Velocity and Scalar Spectra in Premixed Turbulent Flames, 78: 205
- The Relationship Between Cyclic Variations in Spark-Ignition Engines and the Small Scale Structure of Turbulence, 78: 237
- Turbulent Flame Speeds of Hydrocarbon Fuel Droplets in Air, 78: 299
- Visual Observations of a Turbulent Diffusion Flame, 78: 377
- Soot Particle Aerosol Dynamics at High Pressure, 78: 390

### 24. FLAMMABILITY

- Flammability Limits of Arsine and Phosphine, 76: 307
- Lean Flammability Limits and Laminar Burning Velocities of CH<sub>4</sub>-Air-Graphite Mixtures and Fine Coal Dusts, 77: 41
- Radial Propagation of Premixed Flames and  $\sqrt{t}$  Behavior, 78: 275

### 25. FLUID DYNAMICS, STEADY FLOW

- On the Postshock Flow Field of Carbon Particle Laden Gases, 75: 255
- Steady Combustion of a Gaseous Fuel Flowing Over a Hot Vertical Surface, 76: 133

### 26. FLUID DYNAMICS, NONSTEADY AND INSTABILITY

- Pulse Combustion: The Importance of Characteristic Times, 75: 33
- An Experimental Investigation of Flame Behavior During Explosions in Cylindrical Enclosures with Obstacles, 75: 111
- Azimuthal Structure of an Annular Diffusion Flame, 75: 229
- Transition to Detonation in a Flame Jet, 75: 297
- An Experimental Study on Extinction and Stability of Tubular Flames, 75: 367
- Multipoint Ignition by Flame Dispersion, 75: 417
- Definition of Heater Location to Drive Maximum Amplitude Acoustic Oscillations in a Rijke Tube, 76: 17

- Deflagration to Detonation Transitions and Strong Deflagrations in Alkane and Alkene Air Mixtures, 76: 169
